

# Sustainability Solutions

Total Waste Management services designed to minimize landfill disposal, promote safe and responsible waste handling, and support consistent regulatory compliance.

# Who is Wastebits?

Wastebits makes sustainable waste management simple. With powerful tools and decades of industry experience, we provide tailored solutions to help businesses reduce landfill use, recover valuable materials, and protect the environment.

We know that much of what gets thrown away can be repurposed, recycled, or converted into energy—and we provide the guidance and solutions to make that happen.

By cutting costs, streamlining compliance, and prioritizing landfill diversion, Wastebits empowers companies to meet their environmental goals while improving operational efficiency.

**Landfill Diversion**

Achieved in the first year for clients implementing Wastebits-managed sustainability programs.

**Carbon Reduction**

In waste-related carbon footprint through optimized recycling, alternative engineered fuels, and vendor transparency

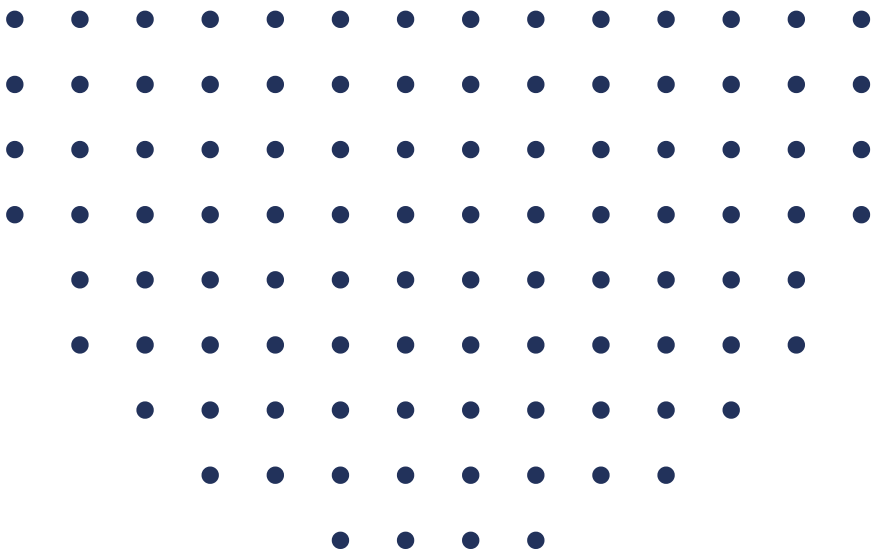

**Traceability**

Traceability of waste streams from generation to final disposition through our software and reporting.

# Our Customers

Sustainability Customers fall into one of three categories based on the level of support. All Wastebits programs, services, and software tools are available to any customer regardless of their personalized support level. That level of support is usually determined by the number of services provided and their frequency.

## Full Time Site Support

These customers benefit from a dedicated full-time Wastebits employee embedded onsite with their local team, typically within the EHS department.

- Full Suite of Sustainability Services
- Customized Wastebits Software Portal
- Long Term Contract

## Hybrid Support

These customers require occasional site visits from the Wastebits team to assist with a variety of needs and projects but the majority of support can often be accomplished remotely.

- Providing Multiple Services
- Utilization of Wastebits Software Tools
- Agreement of Terms

## Fully Remote

These customers only require support and services that can be provided remotely.

- Typically Single Services
- Minimal Software Usage
- Services on an As-Needed basis

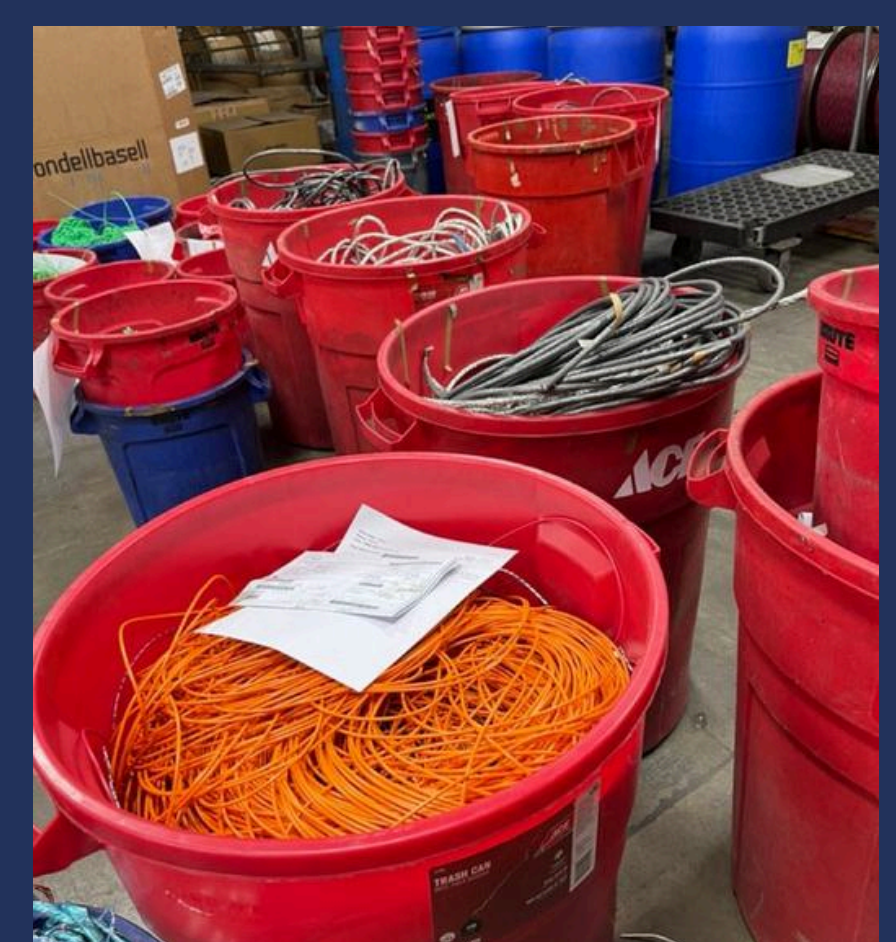

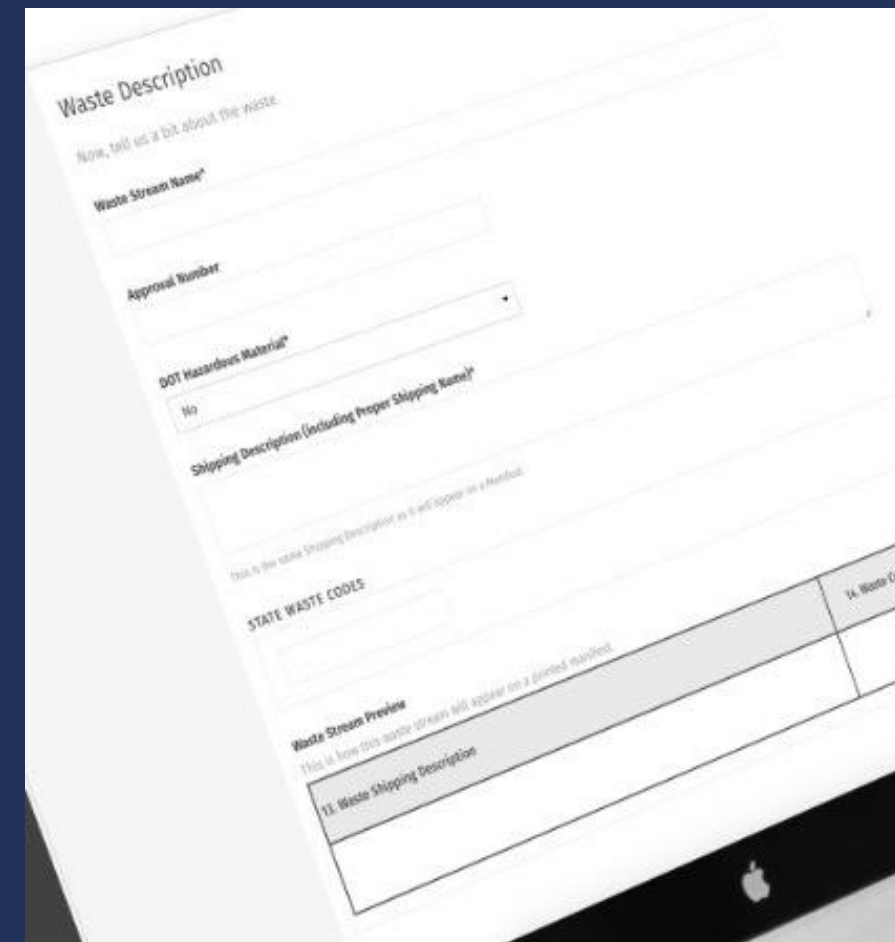

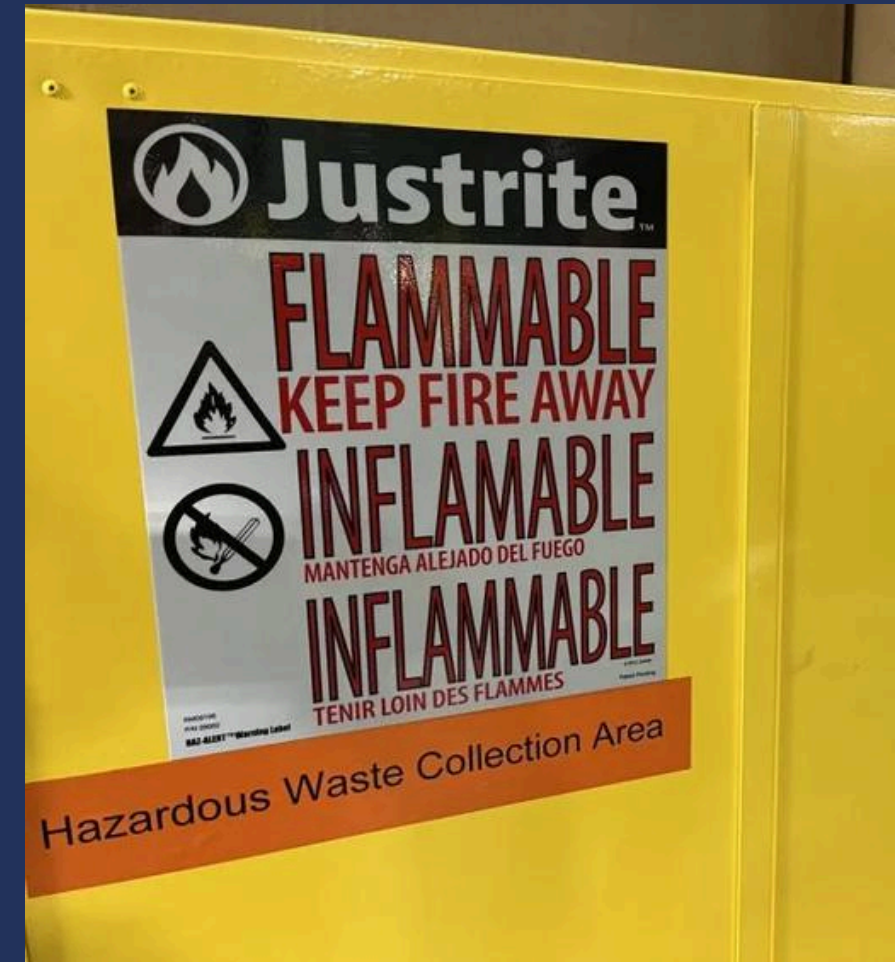

# Consolidated Program Framework

1. Waste Management Software
2. Waste Optimization and Compliance
3. PPE Recovery Program
4. Bulk Universal Waste Program
5. Hazardous & Non-Hazardous Waste Management
6. Recycling Programs
7. Pre-Consumer Product Destruction
8. Industrial Cleaning Solutions
9. Waste Vendor Advocacy
10. Dedicated Personnel

## Technology That Drives Change

Our software is the engine behind nearly every program we offer—centralizing data, automating compliance, and making sustainability measurable and effortless.

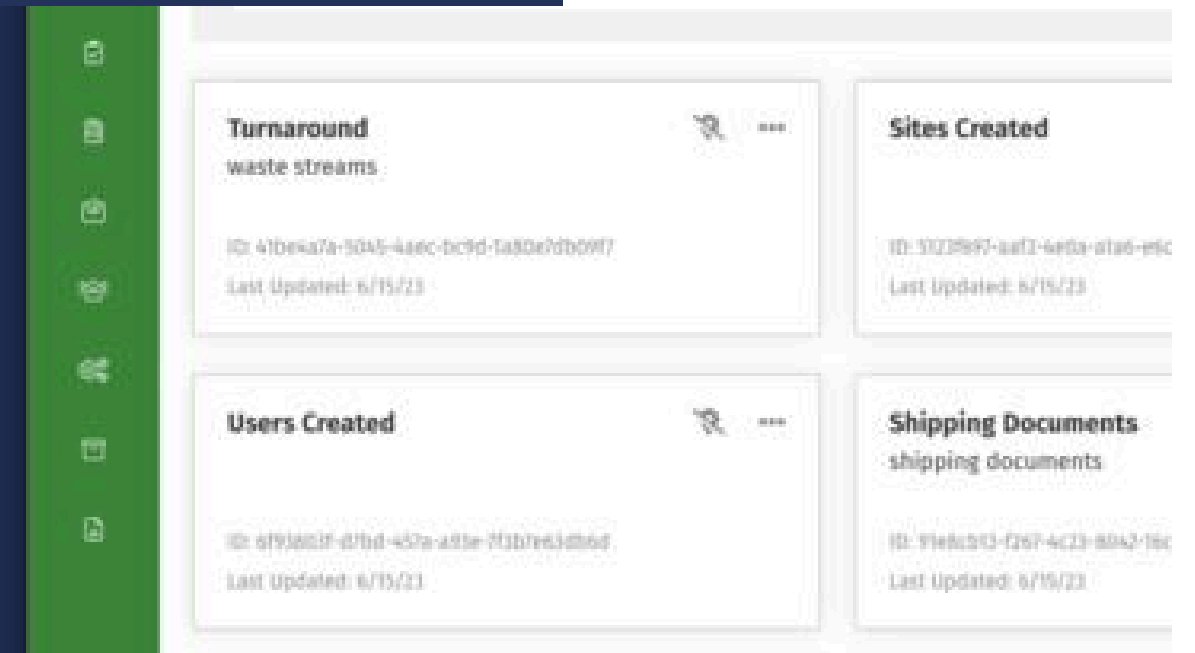

# Waste Management Software

Wastebits' Waste Management Software streamlines the entire waste tracking process, from generating compliance documents to tracking disposal. Designed to be user-friendly, our software helps facilities stay organized, manage multiple waste streams, and maintain regulatory compliance with ease.

## Software Benefits:

- Easy Waste Stream Tracking
- Digital Manifests and Compliance Documents
- Real-Time Reporting and Data Access
- Centralized Waste Management Platform
- Direct EPA Integration
- Supports Multiple Facility Operations
- Reduces Paperwork and Errors

# Waste Optimization & Compliance

Our waste optimization & compliance services provide routine sustainability audits for Wastebits clients, helping ensure continuous compliance, sustainable waste management, and ongoing performance improvements.

These services include regular site visits, comprehensive metric tracking, and administrative support for both remote and local locations—delivering proactive oversight and early identification of compliance risks.

## Expert Guidance in Waste Handling:

- Regular Compliance Checks
- Continuous Improvement Reporting
- Comprehensive Metric Tracking
- Administrative Support
- Waste Stream Analysis
- On-Site Training Sessions

# PPE Recovery Program

Wastebits' PPE Recovery Program provides a sustainable way to handle used personal protective equipment. Instead of discarding used gloves, masks, and other gear, we process and convert them into valuable energy resources, reducing waste and supporting environmental goals.

## A Single Bin Can Include:

- Nitrile Rubber & Cotton Gloves
- Safety Glasses
- Earplugs
- Beard Covers & Hair Nets
- Disposable Garments, Vests, Sleeves
- Boot Covers
- Disposable Masks
- Plastic Packaging of Qualifying PPE

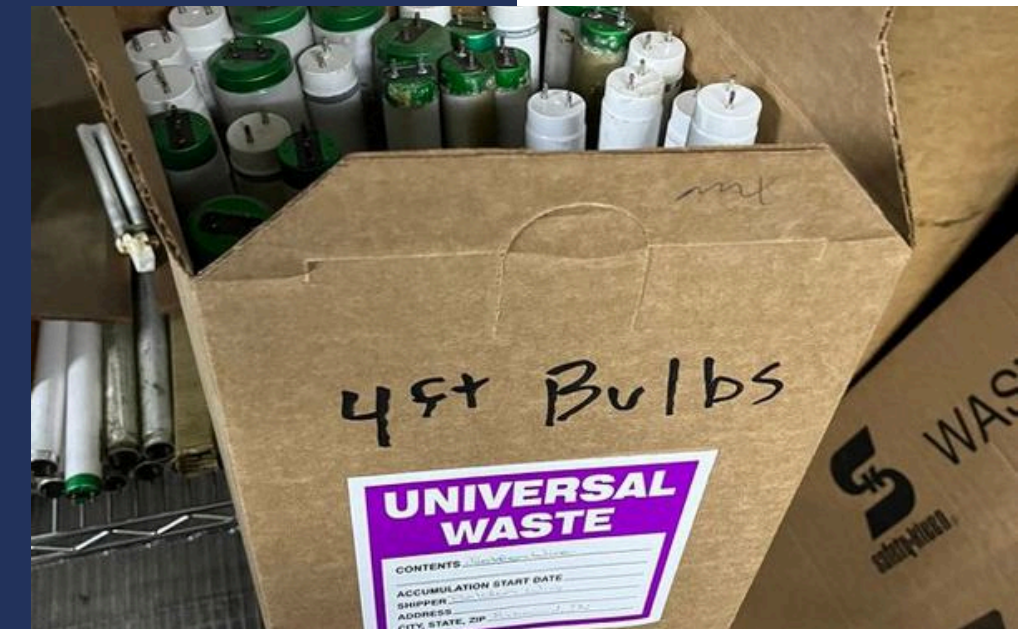

# Bulk Universal Waste Program

Our Bulk Universal Waste Program takes the hassle out of handling large amounts of universal waste, like batteries, bulbs, and electronics. Wastebits partners with top-tier domestic facilities to make sure your waste is recycled safely and efficiently, keeping harmful materials out of the environment.

## Bulk Solutions For:

- Batteries
- Aerosols
- Lighting
- Mercury containing waste
- Confidential Data Destruction
- Solar Panels
- Air Bags
- Large Medical Equipment

# Hazardous and Non-Hazardous Waste Management

Wastebits' Hazardous Waste Management program ensures safe and compliant handling of hazardous and non-hazardous materials, protecting your team and the environment. We manage every step—from proper containment and storage to safe disposal—reducing the risk of spills, contamination, and costly fines.

## Key Benefits:

- Full EPA Compliance
- Safe Containment and Storage Solutions
- Spill Prevention and Risk Management
- Proper Disposal and Treatment of Waste Materials
- Real-Time Tracking and Reporting
- Hybrid e-Manifest Integration with EPA
- On-Site Support for Safe Handling Practices, including Lab Packing

# Recycling Programs

Wastebits' Recycling programs safeguard your circular economy by recovering valuable materials and reintroducing them directly back into the supply chain. Our comprehensive recycling models deliver measurable sustainability impacts while reducing operational costs and landfill reliance.

## Key Benefits:

- Incentive Based Mill-Direct Recycling Channels
- Mixed Recycling and Combo-Load Capabilities
- Bulk & Commodity Material Solutions
- Carbon and Landfill Diversion Reporting
- Real Time Tracking and Reporting
- Cost Reduction and Revenue-Generating Solutions

# Pre-Consumer Product Destruction

Wastebits' Alternative Engineered Fuels (AEF), and Waste-to-Energy Solutions provide you with the safeguards needed to ensure your off-spec pre-consumer materials can NEVER reach secondhand users. We protect your product line, reputation, and the environment by providing secure, documented disposal solutions.

## Key Benefits:

- Guaranteed, Irreversible Destruction
- Brand and Reputation Protection
- Public Health and Safety Safeguards
- Documented, Auditable Chain of Custody
- Secure, Controlled Logistics
- Single-Source Management
- Efficient Recall Solutions

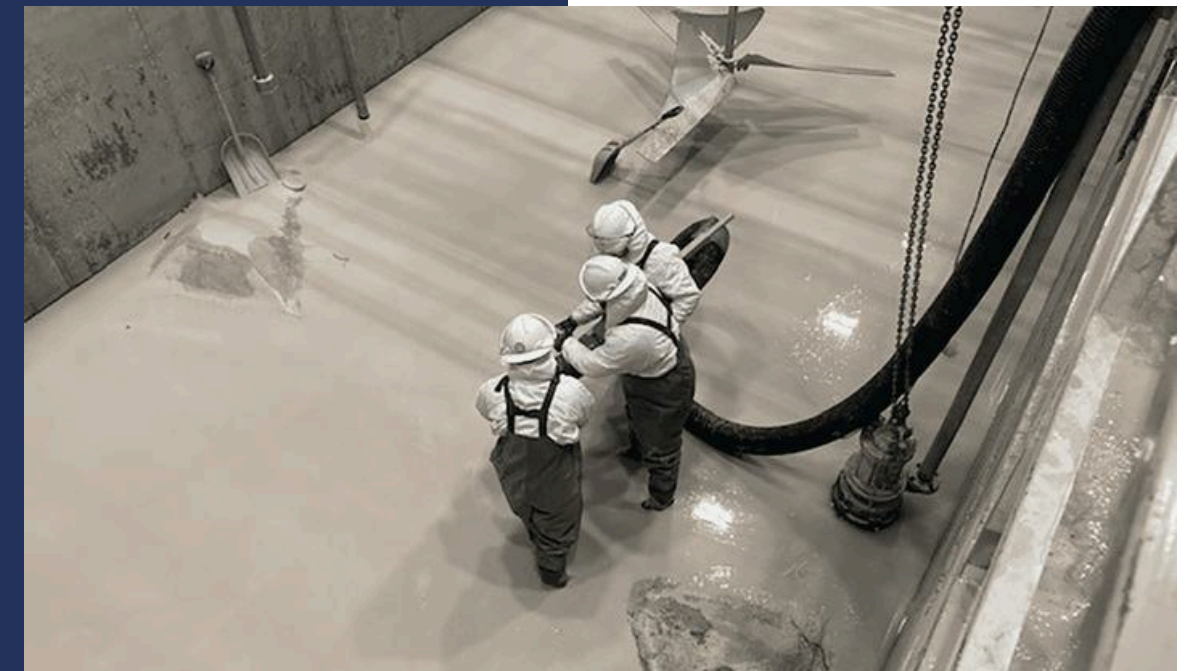

# Industrial Cleaning Services

Wastebits' Industrial Cleaning Services tackle tough cleanup jobs, making it easier to manage waste and keep your facility safe and efficient. Our team works with industrial partners to develop cleaning plans that handle heavy-duty messes, from oil spills to grime buildup, with an eye on safety and compliance.

## Example Services:

- Heavy-Duty Surface Cleaning
- Oil and Chemical Spill Cleanup
- Equipment and Machinery Degreasing
- Hazardous Waste Containment
- Floor and Grime Removal
- Safe Disposal of Contaminants
- Regular Maintenance Cleaning

# Waste Vendor Advocacy

Our Waste Vendor Advocacy program is designed to make sure you're getting the best value from your waste service providers. Wastebits works on your behalf to negotiate competitive pricing, tailor project sizes to fit your actual needs, and find alternate solutions that might save time or reduce costs.

## Solutions Can Include:

- Competitive Pricing Negotiation
- Project and Service Right-Sizing
- Cost-Saving Alternate Solutions
- Vendor Performance Monitoring
- Custom Contract Management
- Ongoing Cost and Service Optimization

# Dedicated Personnel

Our Dedicated Personnel enable you to have on-demand access to waste management experts, providing hands-on support for ongoing compliance, employee education, and daily waste management needs. Based on your tailored solution, this support includes remotely managed services, hybrid, or on-site services with an embedded Wastebits professional serving your facility full or part-time.

## Key Benefits:

- Hands-On Waste Compliance Support
- Continuous On-Site Training and Education
- Immediate Assistance with Waste Handling
- Real-Time Regulatory Guidance
- Customized Waste Management Best Practices
- Rapid Response to Waste-Related Issues
- Implementation of Signage and Support

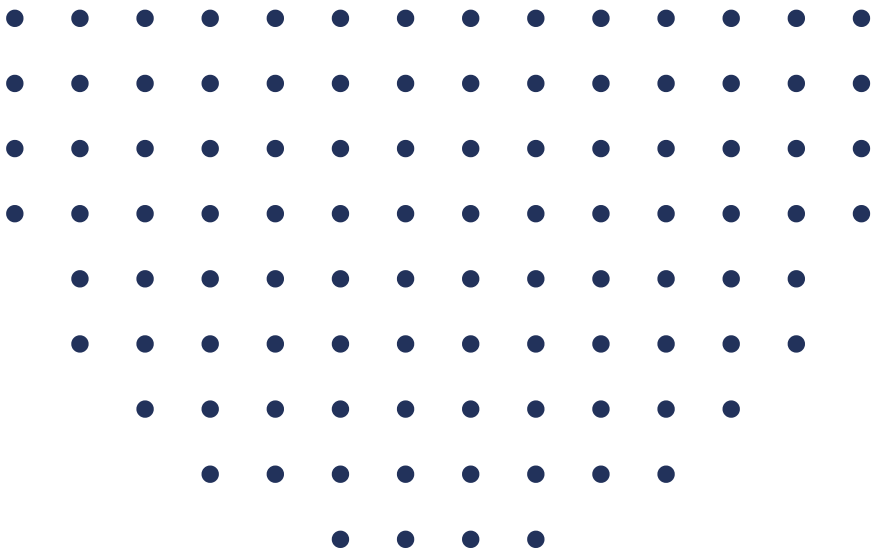

Materials

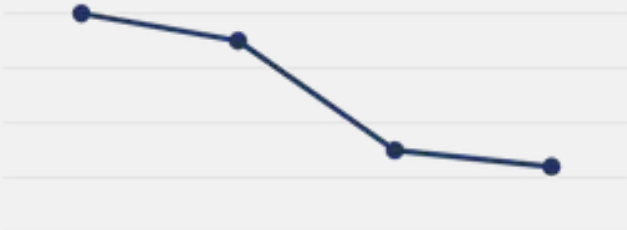

# The Wastebits Benefit

In manufacturing, sustainability is not only a responsible commitment—it is a strategic one. Our sustainability offerings help enhance productivity, reduce risk, and support stronger financial performance.

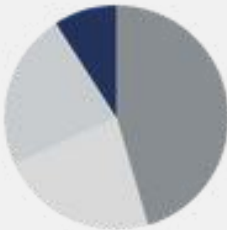

### Reducing Expenses

Vendor advocacy, right-sized projects, and the use of embedded personnel can actually reduce costs of sustainable initiatives.

### Lowering Fees

Hybrid e-Manifests and safety compliance audits reduce mandatory EPA fees and the risk of violations and fines.

### Reducing Landfill Use

PPE recovery, bulk universal waste program, and other recycling/recovery initiatives divert waste from landfills.

### Reducing Carbon Footprint

In many cases we find vendors to re-use or recycle materials, lowering the carbon footprint for our customers.
